Purpose Of Sitemap

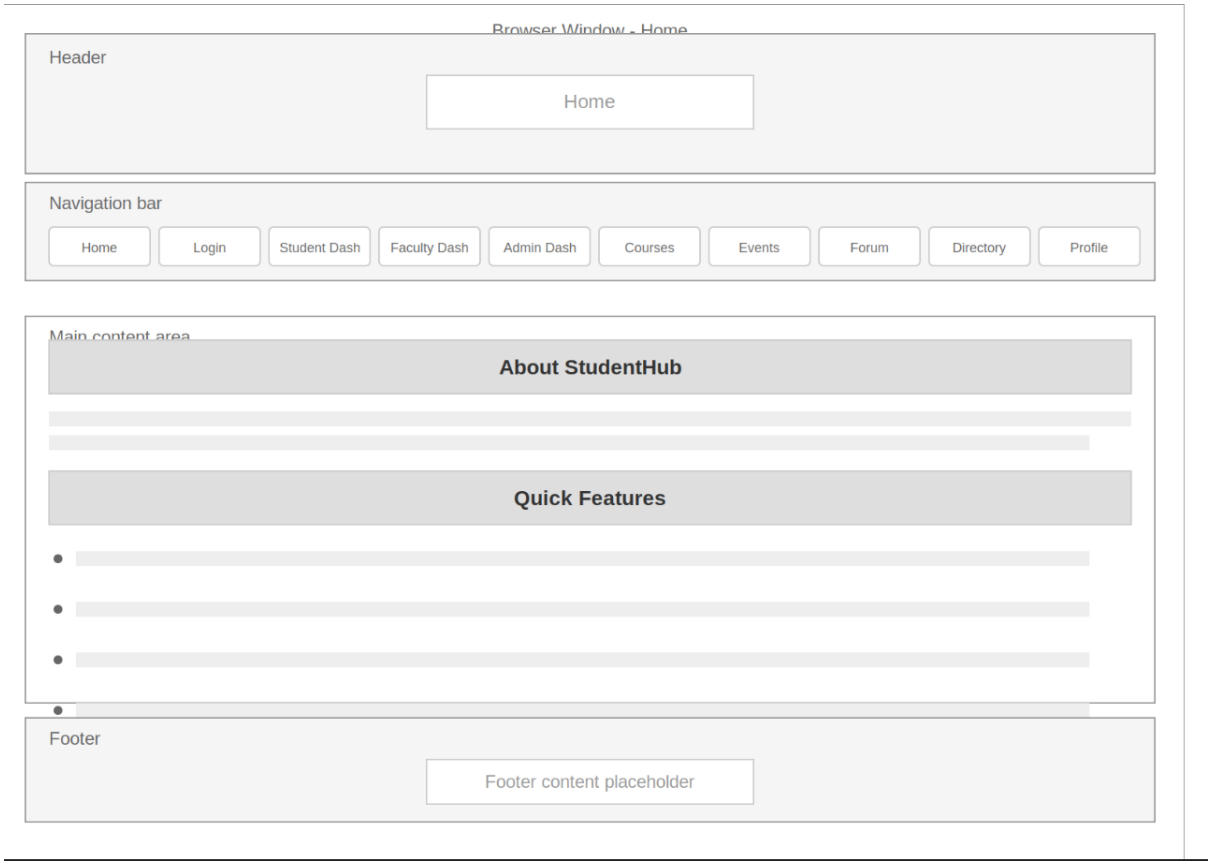

A sitemap represents the structure and navigation flow of a website before development.

It helps in understanding:

- How pages are connected.
- How users move from one page to another.
- What pages are required in the project

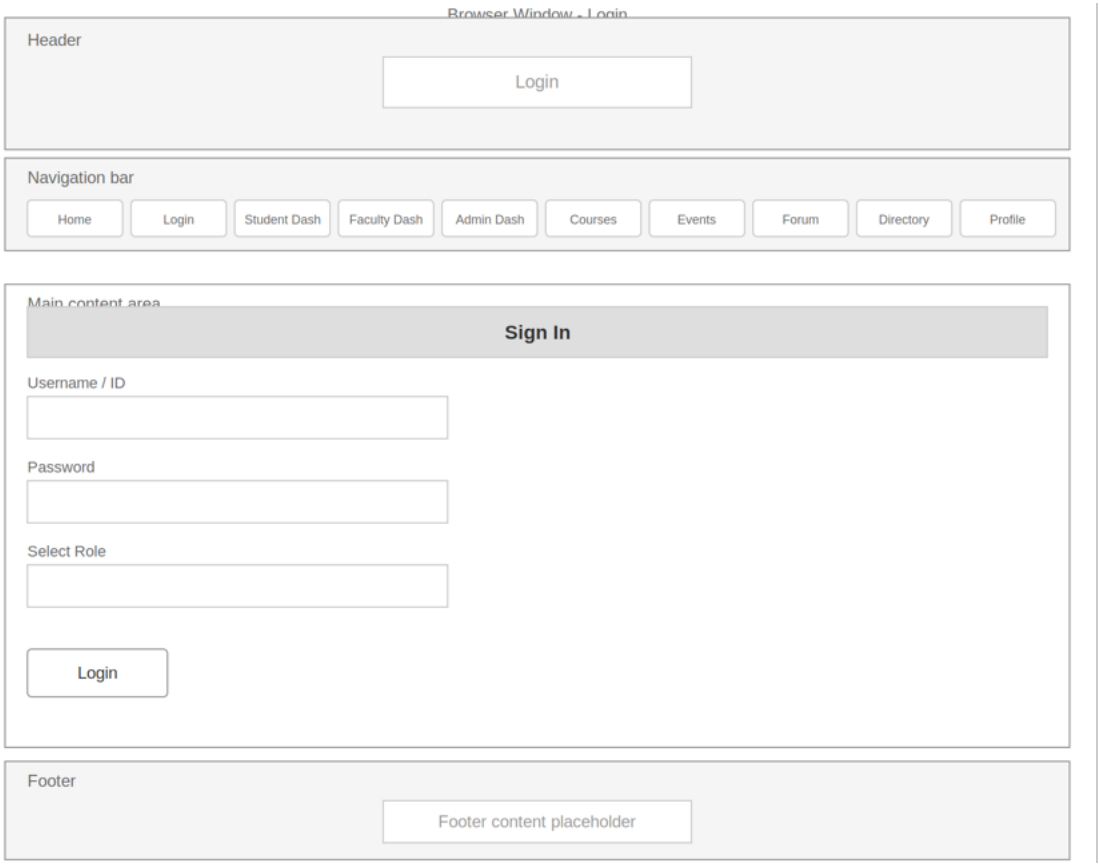

Low Fidelity Wireframes

PAGE 1: HOME PAGE (Home.html)

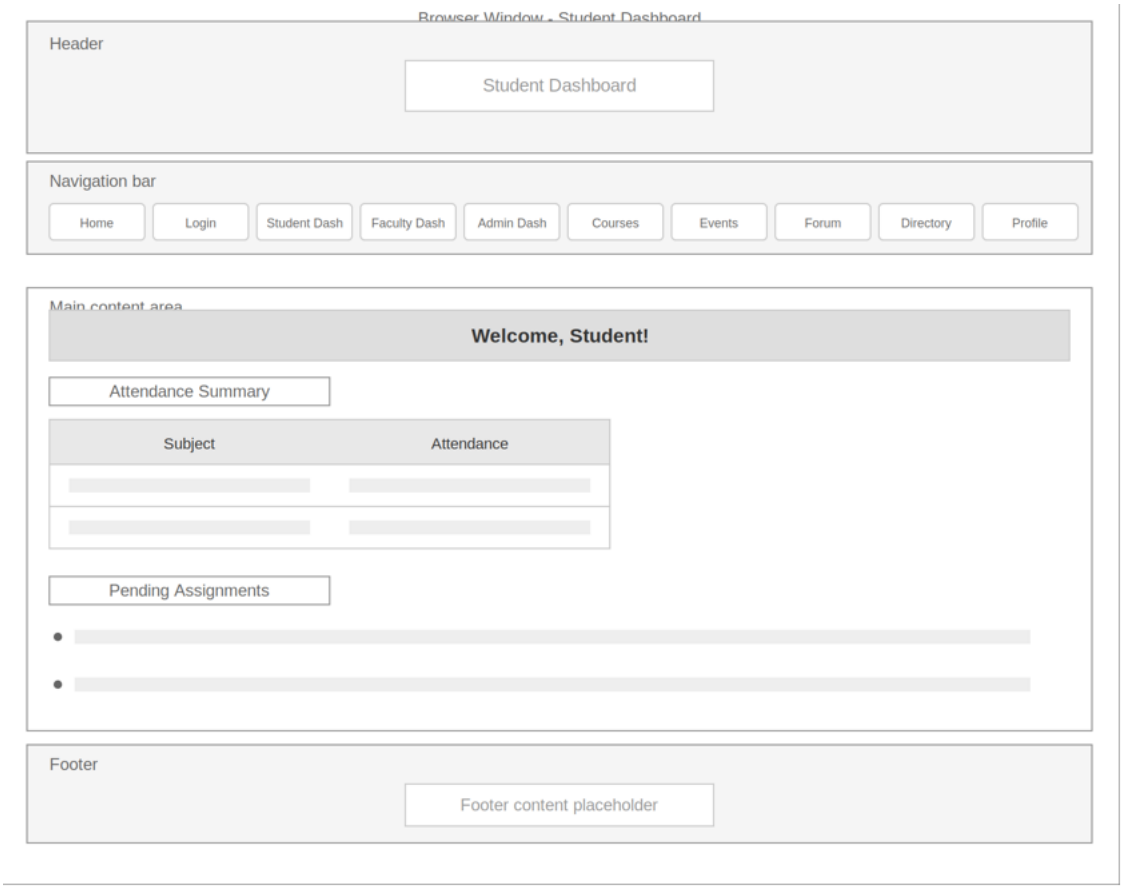

Purpose:
Landing page introducing StudentHub and its main features.

PAGE 2: LOGIN PAGE (Login.html)

Purpose:
Authenticates the user and routes them to the correct dashboard by role.

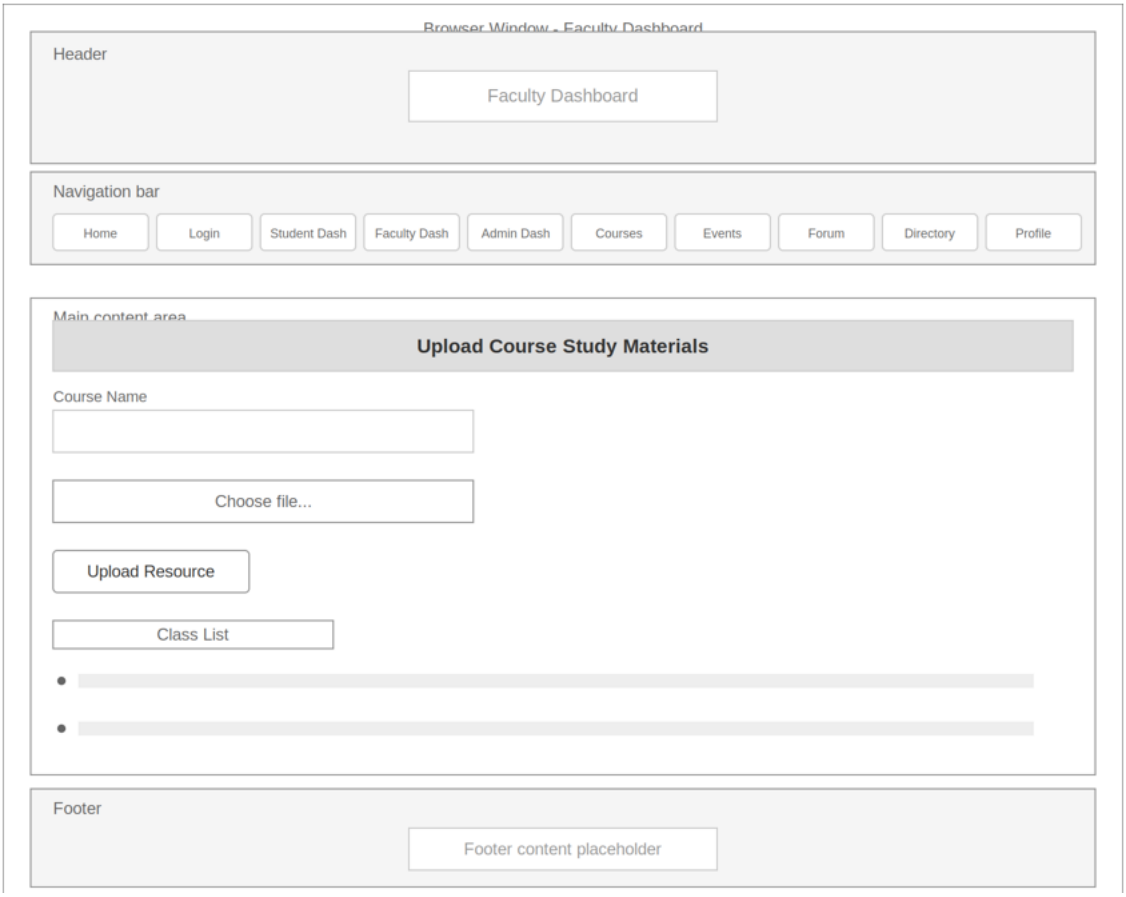

PAGE 3: STUDENT DASHBOARD (StudentDashboard.html)

Purpose:

Shows the logged-in student's attendance and pending assignments.

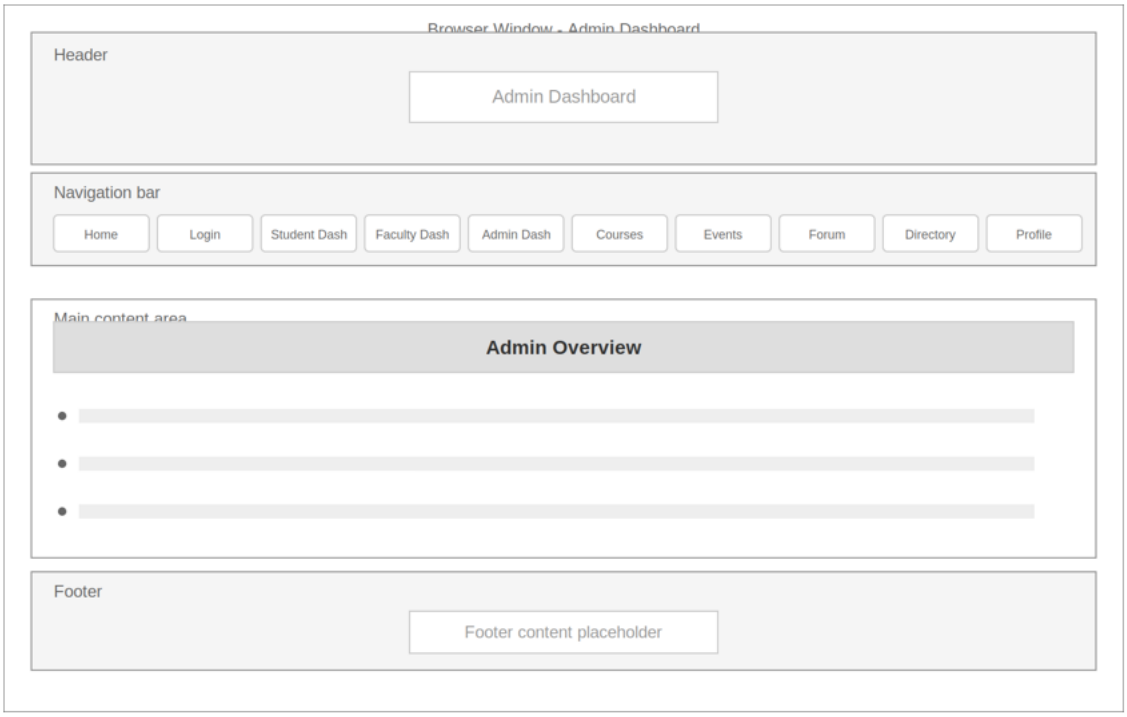

PAGE 4: FACULTY DASHBOARD (FacultyDashboard.html)

Purpose:

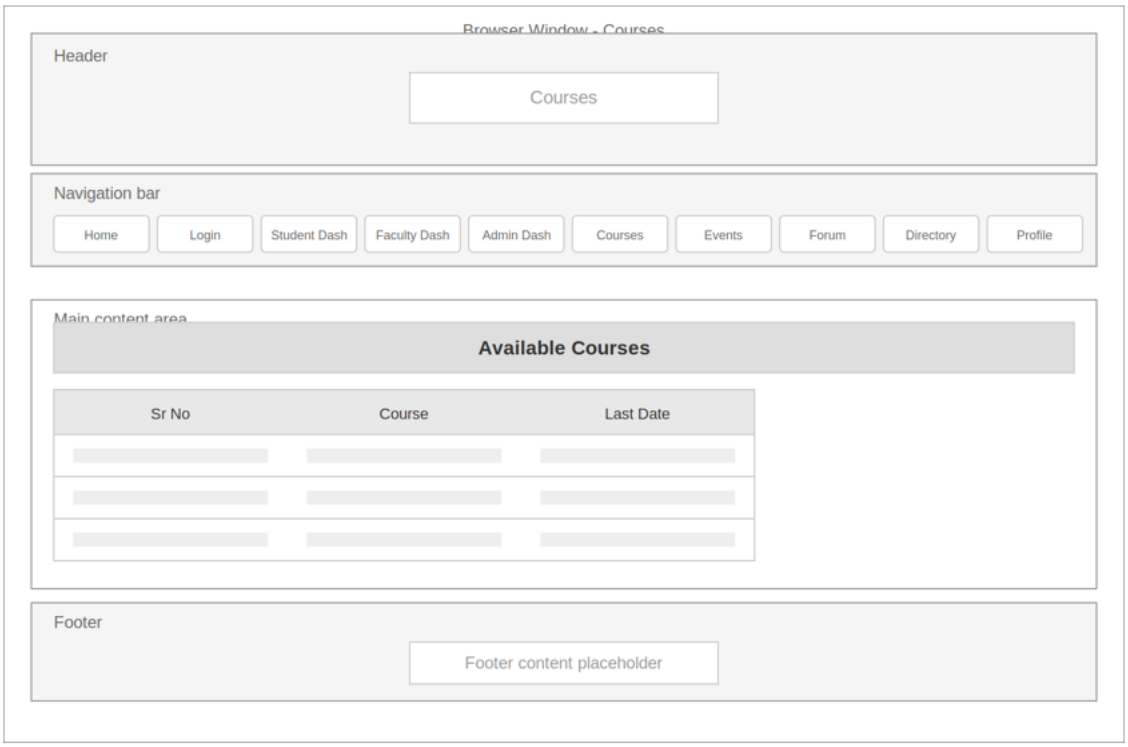

Lets faculty upload study material and view their class lists.

PAGE 5: ADMIN DASHBOARD (AdminDashboard.html)

Purpose:
Entry point for admin-level site management actions.

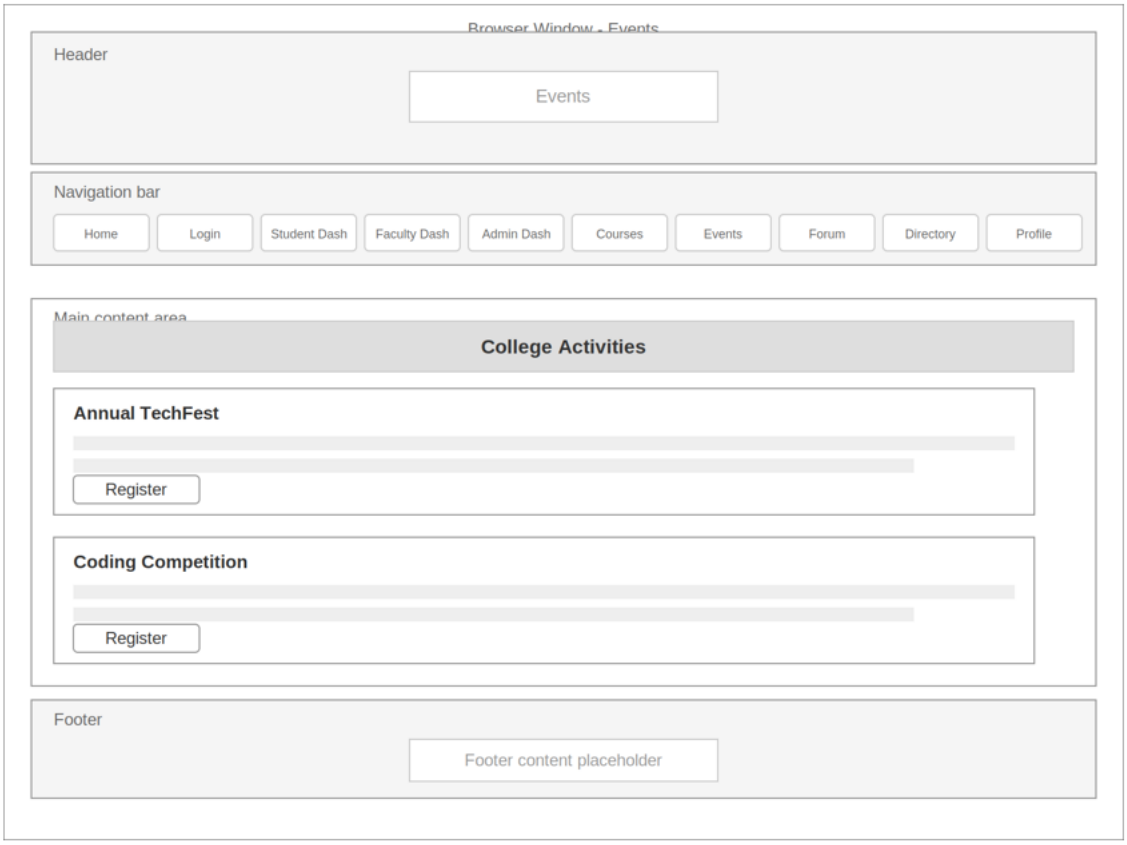

PAGE 6: COURSES PAGE (Courses.html)

Purpose:

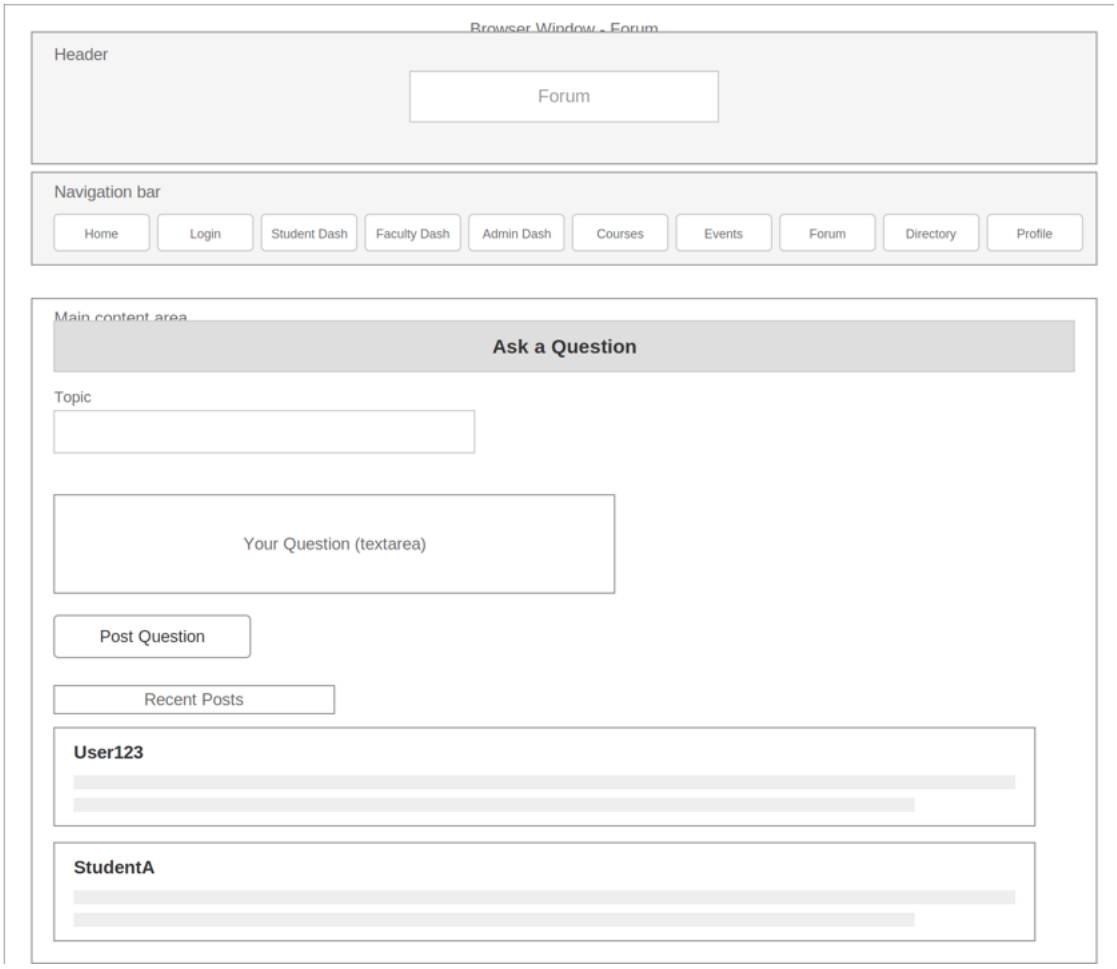

Lists open courses along with their application deadlines.

PAGE 7: EVENTS PAGE (Events.html)

Purpose:
Displays upcoming campus events with registration buttons.

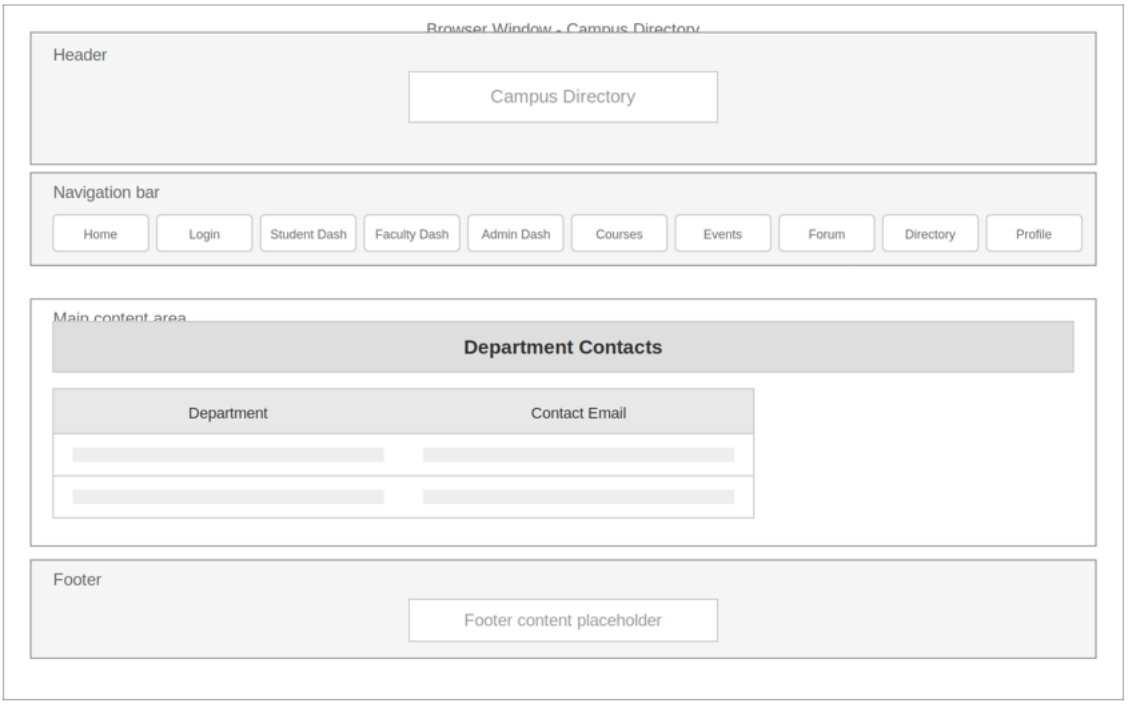

PAGE 8: FORUM PAGE (Forum.html)

Purpose:

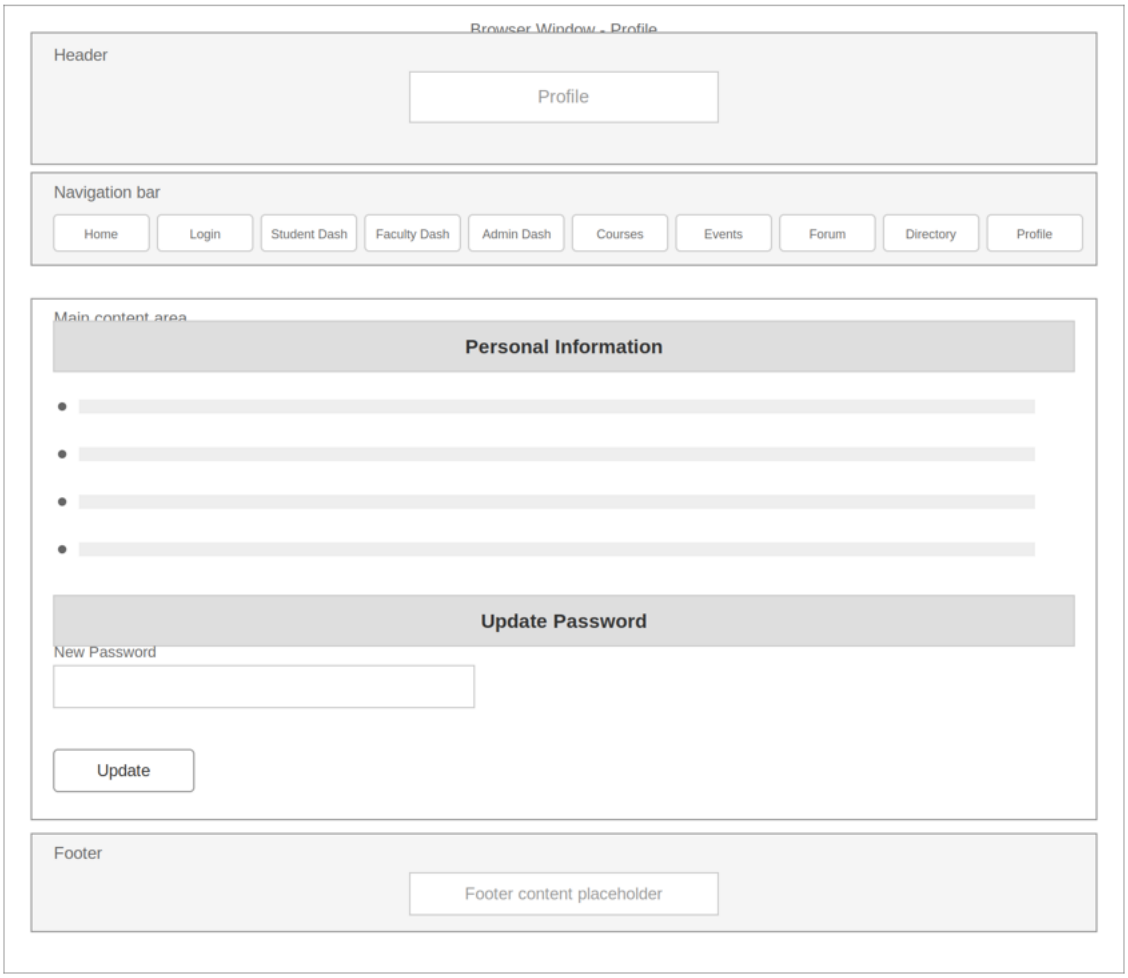

A simple Q&A board where students post and read questions.

PAGE 9: CAMPUS DIRECTORY (CampusDirectory.html)

Purpose:
Reference list of department contact emails.

PAGE 10: PROFILE PAGE (Profile.html)

Purpose:
Displays the logged-in user's details and lets them update their password.

Conclusion

In this practical, the initial planning phase of the StudentHub website was completed. The project requirements were identified, a sitemap was prepared to define the site structure, and low-fidelity wireframes were designed for each of the ten pages to visualize layout and navigation before writing any HTML. These planning steps give a clear blueprint for the site and help keep development organized and consistent across pages.
